Department of Sustainable Development and Ecological Transition offers 3 students the possibility to participate in the Erasmus+ Blended Intensive Program 'Host-Fungus Interactions and Virulence: One health Approach' and 4 students the possibility to participate in the Erasmus+ Blended Intensive Program 'Mechanism and Regulation of Cell Death and Autophagy', both offered by the Universidade do Minho of Braga (Portugal).

Participation in the project entails the acquisition of Erasmus+ student/student status and the recognition of international teaching activities, as per art. 3 of the Call for Participation.

The activities will be carried out entirely in English and in blended mode with the following schedule:

- Host-Fungus Interactions and Virulence: One health Approach: in-presence activities from 19 May to 23 May (Braga, Portugal) and online activities from 26 May to 30 May;
- Mechanism and Regulation of Cell Death and Autophagy: online activities from 7 April to 11 April and 28 April to 2 May and in-presence activities from 5 May to 9 May (Braga, Portugal).

Selected students are guaranteed a financial contribution to cover travel and accommodation costs for the period of the in-presence activities.

**2. ADMISSION REQUIREMENTS**

Students who are regularly enrolled for the academic year 2024/2025 in the second year of the degree course in Food Health and Environment of the Department of Sustainable Development and Ecological Transition may apply.

The maximum number of months of Erasmus+ international mobility for female students is 12 months per degree programme; it is the student's responsibility to ensure that the maximum allowed threshold is not exceeded.

Students who have already carried out, are carrying out or will carry out a period of international mobility using an Erasmus+ Mobility Grant for Study or Traineeship in the academic year 2024/2025 may participate in this selection, provided that the periods of physical mobility do not coincide.

**3. RECOGNITION OF THE ACTIVITY**

Activities carried out within BIP projects will be recognised as follows:

- Host-Fungus Interactions and Virulence: One health Approach: 6 extra-curricular CFU to be recognised as TAF D activity;
- Mechanism and Regulation of Cell Death and Autophagy: 5 extra-curricular CFU to be recognised as TAF D activity.

The ECTS (University Credits) to which the two BIP projects correspond will be recognised as international mobility activities, to which an additional two extra-curricular ECTS (University Credits) will be assigned in relation to the increased commitment. Please also note that the activity carried out in international mobility allows the recognition of additional marks to be attributed to the final degree grade.

#### **4. APPLICATION SUBMISSION**
